

SOORTY ENTERPRISES WATER STEWARDSHIP POLICY

At Soorty Enterprises, we believe that water constitutes an essential component of life and every living thing – human, animal or plant – has a natural right to its free access and usage. This is the only way to ensure that eco-systems continue to function in balance and harmony.

Our goal is to promote progressive water stewardship – within our company and at the community level – which includes taking responsibility for the wellbeing of water resources and instituting effective conservation and sustainability efforts within residences and factories.

We believe and aim to support positive collective actions by companies, communities, NGOs, and public sector organizations and are willing to start with ourselves – by initiating and maintaining best international practices of water governance at Soorty Enterprises through optimizing water usage, improving water quality and reducing water pollution.

We also commit to providing our unending cooperation to government bodies, stakeholders, and policy makers to address water related challenges in order to sustain the blessing of clean water resources for all generations to come.
